

Interest and Impact Table

Primary (P) or Secondary (S)	STAKEHOLDER	NEEDS / INTERESTS	Estimates Project Impact	Estimated Priority
Primary	Owner (HSRW)	1. Reputation 2. Innovative sustainable solutions 3. Advertisement	Med + High + Low +	3
Primary	Team members (Students)	1. Satisfaction of accomplishment 2. New set of skills 3. Possible future opportunities(enlargement of the project)	Low + High + Med +	6
Primary	Citizens	1. Clean environment 2. Sound pollution (avoid) 3. Good looking product	High + Med - Med +	3
Primary	City Municipality	1. Sustainable solution to pond algae Problem	High +	3
Primary	Sponsor(city)	1. Promoting sustainable technologies 2. Positive publicity of the city	High + Med +	5
Secondary	LaGa 2029	1. Safe product 2. Visually appealing product 3. Minimal disruption during operation	High + Med + Med +	7
Secondary	Tourists	1. Pleasant recreational environment 2. Environmentally friendly Technology	High + High +	6
Secondary	University Community	1. Educational value 2. Reliable solution (to algae problem) 3. Visually appealing product.	High + High + Low +	7
Secondary	Biodiversity	1. Sustainable pond Ecosystem 2. Preservation of Natural habitat 3. Minimal disturbance from the product	High + High + Med +	8

Secondary	Businesses	1. Minimal disruption during business operations	Med +	2
Secondary	Insurance company	1. Safe and reliable product 2. Low liability risk 3. Compliance with safety regulations	High + High + High +	9

Week 1 Deliverable

Requirements List Project / Product		
Project:	AlgaNova	
Group:	9	
Revision:	1	
Date:	7/17/2026	

ID	Requirement	Category	Target / Criterion	Unit	Demand / Wish	Weight	Comments
1	Algae removal	Function	20 -> 30	Kg/h	D	10%	High removal efficiency.
2	Water depth operation	Geometry	0 - 1	m	D	7%	Suitable for shallow waters.
3	Operating speed	Performance	~5	Km/h	D	5%	Ensures efficient cleaning
4	Noise emission	Ergonomics	~60	dB	W	3%	Low noise during operation.
5	Energy consumption	Sustainability	500	W	D	6%	Energy-efficient operation.
6	Operating Duration	Performance	~4	h	D	4%	Continuous operation for 4 hours.
7	Algae storage capacity	Function	40	Kg	D	5%	Reduces unloading frequency.
8	Machine weight	Geometry	~80	Kg	W	7%	Lightweight and portable.
9	Regular Maintenance (Cleaning)	Cost	100	Euros	D	4%	Easy and low-cost maintenance.
10	Harmful emissions	Safety	None	None	D	5%	Environmentally friendly operation.
11	Corrosion Resistance	Manufacturing	Visual Inspection	None	W	5%	Rust-resistant materials used.
12	Compact design (Surface Area)	Geometry	1	m^2	W	4%	Easy to transport and store.

13	Attractive appearance	Ergonomics	public opinion on design	None	W	4%	Modern and user-friendly design
14	Durability	Other	10	years/warranty	D	5%	Long service life.
15	Electrical and Radio Regulations	Other	Class 1	None	D	7%	Meets Class 1 standards.
16	Battery Safety Regulations	Other	UN 38.3 Certification.	None	D	7%	Complies with UN 38.3
17	Comply with Local Rules	Other	Law	None	D	5%	Meets local legal requirements.
18	Scalability	Manufacturing	Adaptable to Canal width	m	W	2%	Adaptable to different canal widths.
19	Water proof	Safety	IPX6	None	D	5%	IPX6 water-resistant design.
					Total Weight	100%	
					Check	OK
